

Overview

Electra Private Equity PLC (“Electra”) is an approved Investment Trust, quoted on the London Stock Exchange since 1976. As at 30 September 2019, Electra’s net assets were £210.0 million and its NAV per share was 548.4p.

Investment Objective and Policy

Electra’s investment objective is to follow a realisation strategy, which aims to crystallise value for shareholders, through balancing the timing of returning cash to shareholders with maximisation of value. The Company will not make any new investments but will continue to support its existing investments to the extent required in order to optimise returns.

The Company will retain sufficient cash to meet its obligations and to support its portfolio assets, with cash from realisations being invested in AAA-rated money market funds, pending utilisation or return to shareholders.

Should it be appropriate to utilise gearing in order to optimise the balance between timing of returning cash to shareholders and maximisation of value, the Company will maintain gearing below 40% of its total assets.

Performances
Total Shareholder Return versus FTSE 250 Index as at 30 September 2019

As at 30 September 2019	One year	Three years	Five years	Ten years
NAV per share

Important Information

Please remember that past performance is not necessarily a guide to the future and that the value of shares and the income from them can go down as well as up. Exchange rates may also cause the value of underlying overseas investments to go down as well as up. Where investment is made in emerging markets, their potential volatility may increase the risk to the value of, and the income from the shares. Investments in technology related stocks can be more volatile than investments in more established companies. The principal investments held by Electra are private equity investments, property and private equity funds which are illiquid assets. Above average share price movements can be expected.

As part of its investment strategy, Electra may from time to time borrow money (known as gearing) to finance the purchase of investments for its portfolio. In addition, Electra's underlying investments may themselves be heavily geared which may mean that the valuation of these investments will therefore be affected by the level of interest rates and by the level of equity markets. The level of gearing of Electra itself and by its underlying investments may, depending on the sums involved, have a significant impact on the value of Electra's shares, such that you may not get back the amount you originally invested. The share price of Electra may trade at a discount to the underlying net asset value of the shares.
